

YOUR
SCIENTIFIC ISSUES

DIVERSITY MEASUREMENTS
Alphadiversity & betadiversity,
Microbial taxonomy

CHARACTERISATION
of microbial diversity
amplicon based

DYNAMICS
of metabolic functions
in complex microbial
ecosystems

COMPARISON of taxonomic
profiles between sample
groups of interest

Whole microbial
GENOME TYPING

QUANTIFICATION
of microbial loads

OUR
TECHNOLOGY SOLUTIONS

Low or High
throughput
RT-QPCR

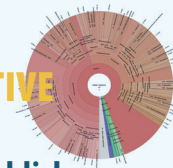

DIGITAL PCR
Quantification of rare events

Reproducible and fast
ILLUMINA MISEQ SEQUENCING
up to 380 samples per run !

INTERACTIVE FIGURES
ready to publish
and easy to use

Complete **INTERACTIVE REPORT**
and figures in HTML format

DNA OR RNA EXTRACTION
from complex
matrices

Targeted
metagenomic
8 DNA samples
per batch
ONLY 87 €
